

Updated Companion Quality Assurance Report

The updated pack was reconciled against the final Book 1 print master for chapter questions, cumulative material, teacher answers, diagnostic notes, student working space, and Recalculation Path alignment.

Required checks

Check	Result
Core chapter match	All chapter resources match the final manuscript, including the restored Chapter 8 Worksheet C Item 15.
Student identification	Every student document contains Name, Grade, and Date fields.
Working space	Every student task provides ruled or structured handwriting space.
Cumulative coverage	All four cumulative checks, all three cumulative reviews, and the final tripwire are included.
Teacher answers	Every student question has an explicit expected answer; no 'see diagnostic above' placeholder remains.
Teacher separation	Answers and diagnostic interpretation remain in teacher-only files.
Recalculation Path	All 24 Number Sense skill routes, student forms, teacher keys, and trackers are retained.
Output	Editable DOCX masters are provided for final visual review. Matching PDF versions remain part of the final companion upload and should be exported only after the Word masters pass visual review.
