

Companion Set Scope and Selection Notes

This updated companion set is aligned to the final Book 3 print master. It preserves the book as the instructional source while providing editable student work, teacher-only answer and diagnostic support, cumulative reviews, and the Recalculation Path.

What changed

- All student printables now use a consistent Name, Grade, and Date line.
- Ruled working space is retained or added on every student task.
- Chapter 6 now includes its Revision, Strategy, and Transfer Packet.
- Chapter 16 now includes Classification and Justification Practice as its chapter-specific extension task.
- Four Cumulative Recalculation Reviews are included as separate student printables with a teacher diagnostic answer guide.
- The complete Recalculation Path is included as a book-level diagnostic and intervention system.

Selection rule

Do not print the entire pack for every student. Use the Ready-to-Learn Check before instruction, select Worksheets A, B, or C according to need, use the Tripwire Check to test a specific misconception, and use the Exit Ticket for a short mastery decision. Use revision, transfer, cumulative review, and Recalculation Path materials only when the evidence calls for them.

Teacher-only materials

Keep teacher guides, answer keys, diagnostic interpretations, and routing guidance out of student copies. A likely misconception is a hypothesis, not a diagnosis; confirm it with a second independent piece of evidence.
